Subject matter

The present application relates to a device for object self-protection.

Prior art

DE 100 24 320 is the closest prior art and describes a search radar for guiding a target-tracking radar.

Problem

The problem with the aforementioned prior art is that a search radar for detecting an attacker is expensive and entails a high risk of giving itself away.

Solution

The invention solves this problem by a passive sensor device for guiding a target-tracking radar, this passive sensor device having all-round sensing capability for determining the angle at which a missile is approaching.
